NEW APPROACHES TO DERMAL COLLAGEN INDUCTION

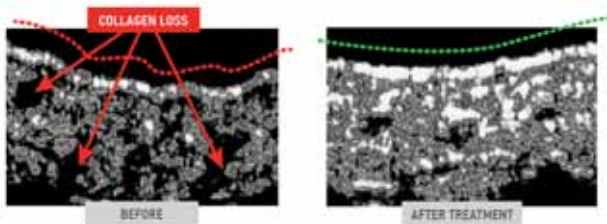

EVENSWISS: PROVEN BEAUTY  **EVENSWISS** 
WITH DERMATOPOIETIN®

Based on 30 years of research a worldwide unique formula has been developed: EVENSWISS with Dermatopoietin®. This professional skin and hair care line combines the innovative concepts of peptide biochemistry, dermatological science and skincare intelligence.

All products have been developed and are produced in Switzerland. The sophisticated formulas make EVENSWISS unique by visibly improving skin and lending you a youthful and fresh appearance.

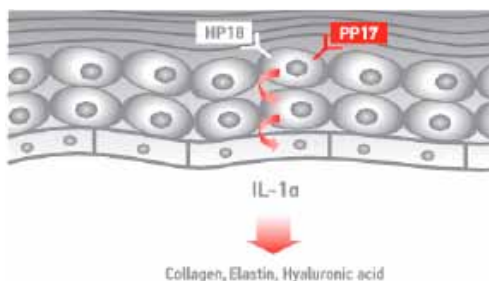

What makes EVENSWISS unique?

- The EVENSWISS skin and hair care line contains the unique Dermatopoietin® Peptide Complex.
- The Dermatopoietin® Peptide Complex has a unique mechanism of action. It affects deep skin layers without penetrating skin.

Dermatopoietin® Peptide Complex

is a full equivalent of the human epidermal cytokine interleukin-1 alpha – the natural polypeptide that controls the homeostasis of skin. It affects deep skin structures without penetrating skin by triggering a cascade of reactions which propagates from the surface to the depth of skin. Dermatopoietin® promotes the production of collagen, elastin and several growth factors and thus supports the skin's natural renewal process.

Don't miss the workshop

'NEW APPROACHES TO DERMAL COLLAGEN INDUCTION'

with Associate Professor Dr. Med. Matthias Aust, Germany and Dr. sc. nat. Peter Schoch, Switzerland two leading scientists in their fields.

Saturday, April 5, 2014 at 9:30 - 10:30 am
in the DIAGHILEV HALL in the Auditorium
Room NJINSKI at the AMWC 2014

Skin remodelling by percutaneous needling: theory & practice

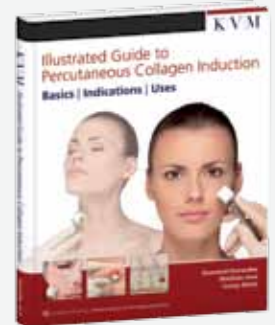

Associate Professor

Dr. med. Matthias Aust, Germany *

Specialist in Plastic & Cosmetic Surgery

*Associate Professor Dr. MATTHIAS AUST is currently the chief consultant for the Department of Aesthetic and Plastic Surgery at the Malteser Hospital in Bonn, Germany. He is one of the leading researchers in the field of anti-aging medicine and finished his professor thesis on skin regeneration in 2010. Dr. Aust has received several prizes for treating skin and scars and has published many scientific papers. He is member of the World Society of Anti-Aging (WOSAAM) as well as a member of the German Society of Plastic, Reconstructive and Aesthetic Surgery (DGPRAC).

Dr. Matthias Aust was trained by Dr. Des Fernandes, a world-renowned pioneer in micro-needling. Their book, 'Illustrated Guide to Percutaneous Collagen Induction' is available in English and German at booth H10 / H12 in the Ravel Hall.
